THE PROPER CARE OF YOUR AUTOMOBILE

Closed Car Tops

MOST automobile owners appreciate that it isn't the original cost, it's the upkeep that makes motoring expensive. Yet, few realize that they can avoid many of the major expenses of an automobile with a little care.

It has been told previously how the finish of the car may be preserved indefinitely by regular cleaning and waxing. This is true also of the closed car top. If care is taken of the top when it is new its life may be prolonged indefinitely at little expense.

Most closed car tops consist of fabric which is coated with a rubber composition and finished with a black baked enamel. Exposure to the weather causes the varnished finish of the top to slowly disintegrate or chalk, which is first

Next: "Refinishing the Top."

SERVICE GARAGE, Stony Plain.

Change in Train Service.

A change in the running time of the passenger trains on this division occurred on the 13th. The new schedule follows—

Train No. 190 now leaves Jasper for Edmonton at 10 a.m. Sundays, Wed., Friday; arrive Stony Plain 8:09 p.m.

Train No. 189 leaves Edmonton 9:30 p.m. Sun., Tues., Thurs., and arrive Stony Plain 10:37 p.m.

A Freak Vegetable.

Mr. Roth on Friday brought to The Sun office an eight-inch parsnip, grown on Harmell Brothers' farm. 'Tis a perfect specimen but for the fact that about 2 inches from its top it is encircled by a link from a castoff transmission belt from a binder. While the robust part of the vegetable is about 2 inches in diameter, the part enclosed in the link is less than one inch.

Mr. Trautman Moving.

Mr. Philip Trautman returned last week from a survey of farm lands in the Westlock district. He was successful in securing a suitable half-section. He, now intends holding a sale on his farm south of town this month, and following this, will migrate to his new location.

Increased Initial Payment

The Alberta Wheat Pool announces that commencing October 1st wheat placed in the 1934-35 pool will receive an initial payment based on No. 1 Northern, Vancouver, of 50¢ a bushel. The pooling of wheat, of course, is entirely optional with the grower. Those desirous of placing wheat in this pool should see the Pool Elevator agent.

The Edelweiss Musicians.

A quintet of musicians from the Edelweiss Club supplied the music at the dance affair held to celebrate the re-opening of Kelly's Hall on Friday night. A good-sized crowd was present, and the new addition to the hall provided ample space for those who wished to trip the lute fantastic. The late start was compensated for by keeping the musicians at their posts until the "wee, wee, wee" hours of the night.

Another of these delightful affairs will be held on Friday, Oct. 12th.

"The Bombshell."

Expectation is said to be running high among local movie fans over the coming to Kelly's Hall this Thursday Evg., October 4, of that popular film "Bombshell," a great war picture, in which appear Jean Harlow and Lee Tracy. With these will be seen Frank Morgan, Frauchot Tone, Una Merkel, Pat O'Brien, Ted Healy.

"The Prizefighters and The Lady," the film shown Thursday, was a real fight exhibition; the principal character parts in it being taken by Max Baer, Primo Carners, Jack Dempsey, Myrna Loy. Those unable to be present on account of the bad weather missed a movie treat.

A New And Better Viewpoint

The recent annual convention of the Canadian Chambers of Commerce held at Winnipeg, was, it is generally recognized, one of the most important and in many respects the most significant gathering yet held by that body. It was not only one of the largest assemblages of outstanding men in the financial, industrial and commercial life of the Dominion yet convened, but it appears to have been animated by a new spirit based upon a fuller recognition of the responsibilities of what has been termed Big Business to the country as a whole and to the manner of producers, workers and consumers who, in the last analysis, are the backbone of the nation.

Important resolutions dealing with matters of far-reaching social and economic questions, and involving vital changes in national policies, were adopted, not the least significant of which was the declaration in favor of the negotiations of a Reciprocity Agreement with the United States in matters of trade. The adoption of this resolution in itself reveals the change in sentiment and viewpoint of the business world of Canada.

Significant, too, were some of the addresses delivered by men occupying high executive positions in the industrial world. For example, Mr. T. A. Russell, president of the Massey-Harris Co., told the convention that "the success of industry and farming were wrapped up together in Canada in a way which nothing could separate," and he gave facts and figures to prove it. As the purchasing power of the farmer declined, said Mr. Russell, so did the demand and output for farm implements. In the case of the Massey-Harris Co., he said, employment dropped from 4,900 in 1929 to an average of less than 1,200 for the years 1931, 1932 and 1933. "Not only has this proved a hardship for the men thrown out of employment through no fault of their own," he said, "but it has tremendously affected their purchasing power, their ability to pay taxes and, generally, to contribute their quota to Canadian prosperity. Likewise, the investor who has had no return on his investment has had to curtail his expenditures and has been a poor customer either for the farmer or for industry." Mr. Russell strongly urged the absolute necessity of complete and generous co-operation with the farming industry in order to bring about its re-establishment and promote its prosperity.

Then, up spoke Mr. W. R. Campbell, president of the Ford Motor Co. of Canada, on behalf of all workers in industry. Space will not admit of any extended quotations from Mr. Campbell's address, but a few will suffice to indicate his position, and the attitude he urged all employers of labor to adopt in the interests of the workers, in their own interests, and in the interests of the country at large. Mr. Campbell said:

"As far as Canada is concerned there can be no normal times until all of our people who are capable of working have an opportunity for gainful employment—free and unfettered by government aid. In dealing with the ills which must be corrected it is time that the very grave importance of our human relationships be recognized. I repeat—until every man in this country capable of working is able to find gainful employment the prime responsibility of industry is to the worker. The employee's interest must not be subordinated to the interest of the shareholder.

"Perhaps," continued Mr. Campbell, "these are rather amazing statements, but not until this condition is brought about can either capital and management or the worker prosper. Our primary duty, then, should be to make certain not only that the interest of labor in the benefits of industry be not subordinated to that of capital, but also that labor be granted an equitable share of these benefits."

Suggesting the only possible way in which industry can be re-vitalized and employment provided, Mr. Campbell said: "What we must do is to start the ball rolling upward injecting more money into our economic structure at the bottom, through the wages of these industrial workers and profit by the steadily increasing circulation of this money upward through our whole business fabric. That is good business because it is profitable. Perhaps it means even the salvation of our industry itself as we know it to-day. Our problem at home, then, becomes one of finding greater markets for the products of domestic manufacture, and this again devolves upon the problem of finding greater employment and providing increased purchasing power for our own workers. By increasing the earnings of the average worker, by paying him a greater return for his labor and by increasing the volume of his employment, by pumping into our economic structure more money at this base, we can get a start toward solution of our problem."

Having made a reference to the further development of export trade, Mr. Campbell concluded: "It is an inescapable fact that we have now entered upon an era of social readjustment in this world. In working out this readjustment so that the rights of both capital and labor shall be properly balanced, it devolves upon capital to take the initiative, with the welfare of the whole nation always in mind. Capital must do this, because capital has the imagination, the training and the ability to assume leadership. Until this proper balance is struck and until this country has been able to lift itself by its own courage and its own ability back to normal times, it is imperative that capital defer profits, defer its claim to a return upon invested wealth, in order to provide all of our people able to work with adequate employment at such a return as to enable them to live in accordance with standards commensurate with the calibre of Anglo-Saxon peoples."

Vancouver Is Likened

To Constantinople

Should Greatly Aid Modern World
States Lord Tomlin

Vancouver, with its natural advantages and geographical position, should be to the modern world what Constantinople was to the ancient world, Lord Tomlin of Ash, member of the judicial committee of the privy council, declared in an address to the Canadian Club at Vancouver.

Lord Tomlin said that Vancouver with its marvelous harbor and a network of railways behind it should be vastly interested in the solution of the world depression. Because, he said, Vancouver should logically hold Asia commercially in fee.

LOST 10 LBS. IN TWO MONTHS

Not too Old to Reduce at 50

Here is a letter which proves that there is no necessity to tolerate excessive fatness, even at the age of 50—

"I was becoming too fat after reaching 50, and had attacks of rheumatism and indigestion. I took various kinds of other medicines, but they did not do any permanent good. Then I commenced taking Kruschen. Soon began to feel different—brighter, stronger, had more energy, no rheumatism, and to my surprise, after two months I lost 10 lbs. In weight, although I was eating much more, as digestion fullness had nearly left me."—W. H. G.

The numerous vital salts in Kruschen stimulate and tune up the bodily functions from a number of different angles. Your stomach, liver, and kidneys all feel the immediate benefit. Your blood is cleansed of impurities and becomes invigorated and refreshed. You forget indigestion, rheumatism, and depression in a new and unaccustomed feeling of physical and mental exhilaration.

Upward of 12,000,000 in Great Britain are insured against unemployment, and 17,000,000 against sickness, maternity, invalidism, and old age.

How are Your Nerves?

Mrs. K. Walden of Hamilton, Ont., said: "I am glad to find a word in praise of Dr. Fowler's Prescription. When I had trouble to use it helped me wonderfully. I was awfully nervous and irritable, tired out and had headaches, but the Fowler Prescription soon had me feeling all right again. This tonic strengthened me greatly." Write to Dr. Fowler's Clinic, Buffalo, N. Y. for free medical advice.

Another Wheat Exporter

Report That France Has Joined The
Ranks of Exporters

The press report that France has left the ranks of wheat importing countries to join those of exporters is of considerable importance to Canada, in that still another competitor is added to the list. Prior to 1929, France did not produce sufficient wheat to meet her domestic requirements, except in years when exceptionally large crops were harvested. Large crops were grown in that country in 1929, 1932, and again in 1933, so that a surplus of wheat has been built up. In pre-war years France produced very large crops. The 1930 crop amounted to 330 million bushels, or equivalent to the production of 1932. In the five-year period from 1909 to 1913, production averaged 317 million bushels per annum. From 1928 to 1932 it was 290 million bushels or about 27 million bushels under the pre-war average. France has not reached her pre-war average acreage of wheat which amounted to 16.5 million acres. The 1933 acreage was 13,358,000 and it has not changed materially since 1920.

India Grateful For Help

Grateful thanks on behalf of all India for the world-wide contributions to the earthquake fund were announced by the Earl of Willingdon, viceroy of India, when he declared the fund would close Oct. 1. A sum of \$2,225,000 has been contributed.

Him: "I hope you'll dance with me tonight."
Her: "Oh, certainly. I hope you don't think I came down here merely for pleasure."

Stately Wedding

Prince of Wales Expected To Be
Best Man At Marriage Of Prince
George And Princess Marina

The world's best-known bachelor, the Prince of Wales, is expected to be the best man at the stately wedding in Westminster Abbey of Prince George and Princess Marina of Greece. The date was announced as Nov. 29.

Little Princess Elizabeth, niece of George, will be a bridesmaid. The date was chosen after long discussions at Balmoral castle, Scotland, in which the king and queen, Marina's parents, Prince and Princess Nicolas of Greece, the Archbishop of Canterbury and the betrothed couple themselves participated.

It was expected the service would be performed by the Archbishops of Canterbury and York. The great ceremony in the abbey will be followed by a short service according to the rites of the Greek Orthodox church, in a room in Buckingham palace.

Their Majesties will drive to the abbey in full state. Prince George will drive separately with the Prince of Wales, while Marina will be in a third procession with her parents.

Must Be Registered

After January 1, 1935, any person found to be in possession of a pistol or revolver when its ownership has not been recorded with the police authorities will be liable to a fine of \$50 or 30 days in jail, or both. This amendment to the Criminal Code was passed at the last session of parliament and it is being proclaimed in the Canada Gazette.

The whale, in quest of food, goes down to the very depths of the ocean.

A Californian used only 13 words to will his \$10,000 estate to his wife.

BABY AILMENTS Relieved!

"Baby's Own Tablets have been the only medicine my four children have ever had. In no single instance has it been necessary to consult our doctor." So writes Mrs. Harry Pliner, Cumberland Bay, N.B. Another Successful Search for Suckers.

An individual appeared in town the early part of the week, soliciting advertising to be placed on hotel blotters. Prices of \$15 and less for spaces were quoted and collected from a number of merchants and business men in this district. The advertising is not worth ten cents of the dollar spent and, as a matter of fact, the amount of money handed over to that individual, if spent with a local print shop, would supply all business people and citizens of the Crow's Nest Pass with blotters galore for the next fifteen years. It's only one of the many examples of how easy it is to get local people to fall for the smooth story of the outsider, who has no other interest in them than to get their money, get it quick and get out, never perhaps to be seen again. That amount of money is gone from the district with the sole exception of the price of a light lunch and two glasses of beer. —Blairmore Enterprise.

Eliminate Canada Thistle.

Canada Thistle flourishes in varying degrees in all parts of western Canada. It is a native of Europe and was one of the earliest weeds introduced into Canada. The Northwest Grain Dealers Ass'n has financed a survey conducted by Profs. McRostie and Tildesley to determine the most satisfactory method of controlling this weed. The results of this study have been prepared in pamphlet form and these are now available without any charge at all line country elevators along with other pamphlets dealing with control of Couch Grass, Sow Thistle and details as to the loss caused thru weeds in western Canada.

Canada Thistle spreads thru seed, running roots, seed grain and manure. It causes damage thru crowding out field and forage crops; by taking plant food and moisture from and reducing value of crops; by increasing the difficulty of cultivation and making necessary the purchase of special machinery as well as causing increased cultivation and more frequent summer fallow. The booklet outlines the means of controlling this weed is thru keeping the infested land entirely black for one complete growing season. Means of doing this are outlined for various types of soil as well control thru chemicals and smothering.

DOMINION OF CANADA

1934 REFUNDING LOAN

The Minister of Finance offers for public subscription

Two-year 2% Bonds, due 15th October, 1936

Issue price: 98.90 and accrued interest, yielding 8.67% to maturity.

Five-year 2½% Bonds due 15th October, 1939

Issue price: 98.16 and accrued interest, yielding 8.90% to maturity.

Eight-year 3% Bonds, due 15th October, 1942

Issue price: 97.00 and accrued interest, yielding 8.45% to maturity.

Fifteen-year 3½% Bonds, due 15th October, 1949

Issue price: 96.60 and accrued interest, yielding 8.81% to maturity.

Principal payable without charge in lawful money of Canada at the Head Office of the Bank of Canada, Ottawa, or at any of its branches in Canada.
Interest payable half-yearly, 15th April and 15th October, in lawful money of Canada, without charge, at any branch in Canada of any chartered bank.

Denominations

Two-year Bonds, \$1,000
Five-year Bonds, \$500 and \$1,000
Eight-year Bonds, \$500 and \$1,000
Fifteen-year Bonds, \$100, \$500 and \$1,000

Cash Subscriptions

All cash subscriptions will be subject to allotment. Following the announcement of the plan of allotment, payment in full for the bonds allotted must be made promptly against delivery of interim certificates, which will be effected on or about 15th October.

Refunding Subscriptions

Holders of Victory Loan 5½% Bonds due 1st November, 1934, after detaching and retaining the coupon due 1st November next, may, for the period during which the subscription lists are open, tender their bonds in lieu of cash on subscriptions for a like par value of bonds in one or more maturities of the new issue and receive allotment in full with prompt delivery. The surrender value of the Victory 5½% Bonds will be as follows:

100% of their par value on subscriptions for the Two-year 2% Bonds and the Five-year 2½% Bonds.

100½% of their par value on subscriptions for the Eight-year 3% Bonds if effected on or before 6th October, and 100% of their par value after that date.

100¼% of their par value on subscriptions for the Fifteen-year 3½% Bonds if effected on or before 6th October, and 100% of their par value after that date.

Holders will receive in cash the difference between the surrender value of their Victory Bonds and the cost of the bonds of the new issue.

The amount of this Loan is limited to \$250,000,000.

The Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge on the Consolidated Revenue Fund of Canada.

The proceeds of this Loan will retire \$222,216,850 Dominion of Canada 5½% Bonds maturing 1st November, 1934. The balance will be used for the general purposes of the Government, including the redemption of short-term Treasury Bills.

Subscriptions will be received and receipts issued by any branch in Canada of any Chartered Bank and by Registered Dealers, from whom may be obtained application forms and copies of the official prospectus containing complete details of the Loan.

Applications will not be valid on forms other than these printed by the King's Printer.

The subscription lists will open 1st October, 1934, and will close on or before 15th October, 1934, with or without notice, at the discretion of the Minister of Finance.

DEPARTMENT OF FINANCE,
OTTAWA, 1st OCTOBER, 1934.

Wheat Acreage Reduction.

The Pennsylvania Farmer: "An official announcement proclaimed that reduction in wheat acreage in the U. S. for next year's crop is 10 p.c. instead of 15 p.c. below the 5 year average. It is not highly important whether the official reduction prescription is 10 p.c. or 15 p.c. or any-

thing. With dollar wheat or better, American farmers are going to sow plenty of it if the season favors extensive seeding. Conditions at seeding time and subsequently are going to have more effect on acreage and production than any mere official or human agency can have.

PEOPLE, BOOKS AND THINGS

A WEEKLY CAUSERIE OF MATTERS—TREATED
IN LIGHTER VEIN

INSPECTED MILK—THE MEN- ONITE EXODUS—SIR JOHN FRANKLIN—THE DAY OF THE WOMEN—A LADY SPEAKER OF THE B. C. LEGISLATURE.

A recent outbreak of typhoid at a Regina college, which is alleged to have been traced to an infected milk supply, has given rise to a good deal of discussion in health circles as to the best way in which to protect the milk supply of the larger cities and towns of the west. It is asserted that in this instance the milk had been handled by a person who had suffered from typhoid, and was still giving off the infection.

It is obvious that a means has to be devised to prevent an occurrence of this nature in the future. The menace is a deadly one. If the medical authorities are correct in their conclusions as to the origin of this outbreak, it means that at least eight young lives were lost owing to the unhygienic handling of this particular milk supply, and every precaution must be taken at once.

Most of the medical men appear to be of the opinion that all milk coming into a city should be pasteurized before being purveyed to the public. In the case of Regina the medical health officer brought in a recommendation that no milk should be sold in the city until it had been pasteurized, but the city council did not see fit to give it effect. Possibly the reason for this was that the only pasteurizing plant owned by a large dairy concern and the passing of such a resolution would mean throwing all the business into their hands, and the absolute destruction of the business of the smaller dairymen of the city.

Nevertheless it is essential that human life shall be protected even if it conflicts to some extent with private interests. At the same time it is quite undesirable that a monopoly of the milk business should be created. If the city fathers of Regina or any other western city are desirous of protecting the interests of the smaller dairymen, and are at the same time anxious to guard against the spread of typhoid infection, it would appear that the establishment of a municipal pasteurizing plant for the treatment of all milk coming into the city would solve the problem. The scheme is well worthy of consideration.

A statement was recently made in the daily papers that many of the Mennonites in western Canada were contemplating an exodus to the state of Mississippi, where they will be allowed to practice their peculiar observances to their heart's content. It seems that Mississippi is a peculiarly tolerant state, and the authorities do not seem to care much whether school keeps or not. The children may go to school or stay away just as they please, and there are no truant officers to put a wholesome fear into parents or children.

In Canada we don't want people who will not assimilate with us and bear the burdens of a common citizenship. The most rigid of the Mennonites will not send their children to public schools, nor will they teach them in any language except German. Neither will they agree to take part in anything that savours of war. In fact, although many of them have lived in Canada for a good many years, they do not wish to become Canadians. They keep their communities Little Russia, or Little Holland; as the case may be.

As far as we are concerned, we are quite ready to let them go. Their land and their room is preferable to their company. Now,

however, certain members of the American Legion are protesting against their entrance into the United States, and they seem to be between the devil and the deep blue sea. People who either through bigotry or intolerance refuse to identify themselves with the national life of the country in which they are domiciled are undesirable citizens. They are people without a country, and if the Mennonites do not wish to pass the generations wandering up and down on the face of the earth, they had better alter some of their iron fanaticism. They are a good, thrifty, industrious people and we will be glad enough to keep them in Canada, if they will subscribe to our ideals, and become amenable to our laws.

It seems to me that the school children of this western country of ours are not given much instruction in the early history of our own country. They are given a rude epitome of the doings of such early explorers as Cabot, Champlain, and LaSalle, but it is served up to them in such bald form that it is unpalatable mental food and apparently makes little impression either upon their imagination or their memory. How many of them know for example, the stirring story of Vancouver, the first of the great path finders to adventure on the endless grassy sea of the prairies; or how Sir John Franklin, with his companions, in the early days of the nineteenth century landed in Hudson's Bay, wintered in the Saskatchewan country, and then set out to reach the Arctic coast by way of the Coppermine River?

I have already tried to tell the story of Franklin's search for the Polar Sea, in this column, and it is indeed a stirring tale of adventure and heroism. After enduring dreadful hardships these brave men succeeded in winning their way back to the saving shelter of a Hudson's Bay post, and eventually reached England. In 1827 Franklin again sought the Arctic ocean, this time by way of the Mackenzie River, and in 1845— with two ships of the British—he took the ocean road to the polar regions. Neither he nor any of his companions ever returned from that disastrous voyage and a long time after their fate was secret locked in the impenetrable heart of the Arctic.

The British Government sent out search expeditions but they returned without bringing word of the wanderers. Lady Franklin used all the resources at her command in fitting out relief expeditions, but without result.

I have often heard my father tell that when he was a child Lady Franklin stayed in the home of his parents in the Shetlands, where she had gone to get the first news of the relief vessels. This brave and devoted lady, who, as the years went on, became a tragic figure of sorrow with her anxious eyes and sombre raiment, used to spend her time in a high room in the old house in Shetland that overlooked the sea. She was constantly watching the ocean through a strong telescope, and when she would see the square topsails of a Greenland whaler lifting from the horizon, she wended her way to a nearby cape and watched it enter the sound in the hopes that it might bring some news of her husband.

It was Dr. Rae, a commissioned officer of the Hudson's Bay Company, who eventually established the fate of Sir John Franklin and the members of his company. With a well-seasoned party of winter travellers he set out from Fort Garry and travelled clear to the Arctic where he discovered the relics of Franklin and his men, and learned from the Esquimaux how they had met their death.

For the first time in Canadian

history a woman is to occupy the speaker's chair in a provincial legislature. Mrs. Ralph Smith, who proved her popularity by polling an enormous vote in the Vancouver constituency during the recent general election in British Columbia, is to have that honour. She is the widow of the late Ralph Smith, who for a number of years was a member of the Federal Parliament for the Nanaimo constituency. On her husband's death she entered the political arena herself and her abilities and personality won her success at once. She is an able and convincing speaker, has plenty of decision, and is unusually well informed on public affairs.

Truly women are coming on. It is only a few years ago since the suffragettes were agitating for votes, and already we see members of the female sex attaining to high office. Mrs. Smith is to be congratulated on being the first woman to attain such a high position in the legislative machinery of the country.

From Calgary comes the news of another important appointment going to a lady. Mrs. Fred Langford, who for four years has been a member of the school board of that city, has been appointed chairman of the board. She is a fine public spirited woman, who for some years has taken an active part in public affairs in Calgary. She is the widow of a Methodist clergyman, and has been in Alberta for more than twenty years. In addition to being a person of brains and intelligence, Mrs. Langford is one of the handsomest women in Canadian public life. She is not by any means young but that does not detract from her attractiveness.

Dominion Express Money Orders are on sale in five thousand offices throughout Canada.

Will Turn Out Government Boats
The keels of two new government steamers, the Canadian Transporter and the Canadian Trader, were laid at the Cowichan shipyard in Vancouver recently. Seven hundred men are engaged in the yards.

A Famous Cow
Four calves at one birth all living and doing well, is the record of a cow belonging to J. O. Patterson, rancher of Grande Prairie, Alta. The calves are three males and one female. The parent of the quadruplets is in poor condition, yet there are hopes of saving her life.

AN APPRECIATION

THE PUBLISHERS' NEWS SERVICE LTD. is not usually censored, but we cannot refrain from publishing the following letter which is one of many we have received.

THE MELVILLE PROGRESS

"ANYTHING IN PRINTING"

Melville, Sask., December 10, 1920.

Messrs. The Publishers' News Service Ltd.,
McCallum-Hill Building,
Regina, Sask.

Gentlemen:

We feel that we owe you a word of appreciation for the very efficient and popular ready print service you have been giving "The Melville Progress" for the last half year. During that period this journal has made tremendous strides, having moved into the seven column class on Armistice Day, 1920. Since May last we have been the recipients of many pretty compliments from this section of Saskatchewan, and we feel that a good deal of our growth has to be credited to the fine service which has been supporting us in the form of the Western ready print. So, Gentlemen, knowing this as we do, it is a very great pleasure to be able to send you the foregoing little message of thanks and appreciation.

Within a comparatively short period we look for the Western Ready-Print to have made a complete conquest of the weekly newspaper field in prairie Canada. We hope so, for we are western men, and have long felt that an effort should be made to balance our country somewhat better—population, finance, industry and the power that is "The Press."

With every good wish, we remain,

Faithfully yours,

"THE MELVILLE PROGRESS"

Per D.

Pithy Paragraphs For Busy People

THE WEEK'S NEWS IN TERSE TERMS

Proprietor Paralyzed

A quiet looking man recently entered the grocery store of Martin Hoffner, 36 Ivesville Street, Montreal, and stole \$20.00. Business being rather dull at four o'clock in the afternoon, Hoffner was sitting behind the counter when a stranger entered and paying no attention to the proprietor, walked to the cash register and calmly helped himself to \$20.00. He then put the money in his pocket and went out, leaving the astonished Hoffner wondering whether or not he had had a dream.

Cheaper Suits

The market for men's spring and summer clothing was opened in Chicago last week and the manufacturers offered suits much below that of the spring of 1920. One of the leading factories in the ready made trade quoted the manufacturer's price of wool suits at \$25.00, compared to \$40 last fall and \$37 a year ago. The very finest worsted suits in America are now offered at \$55 as compared to \$80.

Mrs. Langford Heads Calgary School Board

Mrs. Fred Langford, who has been for three years a school trustee in Calgary, has now been named chairman of the board for the coming year. She is the first woman to hold the position in that city. There are also two other women on the board. Civic employees will demand a ten per cent. increase in salaries and wages in Calgary for the year. Heads of departments have, however, refused to ask for an increase.

Mayor After Fourth Term

Alisterman Kirk recently announced that he would not be a candidate for mayor against Mayor R. H. Gale at the civic elections in Vancouver, January 13. The contest will be between Mayor Gale who is seeking a fourth term, and ex-Mayor L. D. Taylor.

Gets \$3.00, Overlooks Roll

An unknown gunman held up Bert Mears, a truck driver for the Hudson's Bay Company some days ago and took \$3.00 from him. He overlooked \$200 which was in another pocket. The police have arrested Conrad Haase as the man who held up Eric Peters and robbed him of \$74 recently. The robber used a 15 cent water pistol to hold up Peters.

Radium to Be Kept for Fighting Disease

So great is the demand for radium in the treatment of cancer and other malignant diseases, that a movement is on foot to withdraw it as much as possible from the manufacture of luminous dials and other industrial purposes so that it may be employed entirely for the treatment of human illness.

Unemployed in Hamilton Make Demonstration

About five hundred men out of work gathered in the Market Square some nights ago and complained of having been shut out of the armories where they declared they would hold their meeting whether the authorities approved of it or not and suggested taking desperate means to end the distress consequent upon unemployment. The meeting was orderly, however. The men marched to the residence of Mayor-elect Coppley who addressed the field and told them to wait upon him at the city hall on Friday.

A Whisky Ring

A nation-wide whisky ring, backed by prominent persons, including federal officials and congressmen, and with headquarters in New York, Chicago and Jersey City, N.J., was revealed in the arrest of John Costello.

Electrocuted in Bathroom

Mrs. Ada Bagnall, aged 48 years, was electrocuted in the bathroom at her home in Toronto last week.

Four Candidates in Peterboro

Thomas McMurray, a carpenter, was the choice of the Independent Labor Party at a meeting held in Peterboro recently, as the Labor candidate in the coming by-election in West Peterboro. This makes four candidates in the field with a fifth likely to be nominated by the Liberal Party.

Polish Consul Called to Warsaw

The consul for the Polish republic in Western Canada is now in Fort William on his way to Europe. He declined to discuss his summons other than to say his government is desirous of receiving information relative to Poles in Canada.

Stake Stops Burglar

Alone in his home at 35 Spencer Avenue, Toronto, Camilla Boland aged twenty-one, discovered a burglar crawling up the front staircase. She snatched a loose skate on the landing and hurled it with all her strength at the face of the burglar, cutting a deep gash in his forehead, just as he was about to spring at her. The thief flew through the back door with blood streaming from his wound.

Plant to Re-open

The Studebaker Corporation is to resume work on a scheduled production of ninety automobiles per day, on January 10.

Next Governor General

It is reported that Viscount Burnham will be offered the Governor-Generalship of Canada, in recognition of his long substantial services to the government. Lord Burnham recently returned from a tour of the Dominion with the Imperial Press Conference party.

Mennonites Arrive in South

The advance guard of the colony of Mennonites from Canada who recently announced their intention of migrating from Canada to the states of Mississippi and Alabama, have recently arrived there. The advance party is composed of men only who will build hotels and community houses to take care of the other members of the colony pending settlement of the lands acquired. The Mississippi department of the American Legion recently protested to the State Department against permitting the Mennonites to enter the United States on the grounds that they were "pacifists" during the war, but the State Department officials pointed out that the individuals of the sect could not be barred on any such grounds.

Enlarged Territory

H. Milton Martin, Belgian consul agent for northern Alberta, has been appointed Belgian consul for the province. His former territory consisted of northern Alberta only.

Plans For Producing Valuable By-Products From Wheat Surplus Are Being Considered

Plans for producing valuable by-products from Canada's wheat surplus are being earnestly considered by a scientist at the Canadian Pulp and Paper Research Institute at McGill University.

Dr. W. Boyd Campbell, consulting physical chemist to the forest products laboratories, said that in China by an ingenious method scientists had succeeded in producing a valuable substance known as monosodium glutamate from wheat, and added the surface of the possibilities of converting wheat into more costly products had only been scratched.

"If the Dominion," he said, "were to spend a small fraction of the money it has spent on providing transportation and handling facilities for the Dominion's wheat crop on research for new outlets and new uses of wheat, I believe the wheat surplus would in time become a forgotten glory. I would suggest the Dominion government include in the budget, as a start in the right direction, the sum of \$500,000 to be used in this research over a period of five years."

The monosodium glutamate being made in China, of which Chinese have sold between \$1,000,000 and \$2,000,000 worth annually, was until recently a rare chemical. It is used in China and Japan much the same as sugar and salt are used here.

Canadian wheat, with its comparatively high content of protein is the best wheat for manufacture of this condiment, the scientist said.

Wheat worth two cents a pound was thus transformed into a substance worth from \$2 to \$3 per pound.

Laborers Will Occupy Historic Old Cottage

Home Of Anne Boleyn Bought By Henry Ford

The only home Anne Boleyn ever owned—a cottage near Chelmsford, England—has been bought by Henry Ford.

He is spending \$1,250 on having it rebuilt as it was 400 years ago, when King Henry came down from London to see his sweetheart who changed the course of English history.

Then it will be divided into two cottages, to be occupied by laborers on Mr. Ford's farm. One of Mr. Ford's farm workers lives there now. Bull's Lodge—Anne's surname was often spelled Bullen—stands back in a field behind a tangle of country lanes.

It was here, then one day's march, now an hour's ride, from London, that the Crusaders of the middle ages pitched their first camp on their way to the Holy Land.

And it was here that M. Livermore, a south country shepherd, brought his flocks to graze six years ago. Down below, in the cellar, he found an underground passage leading to the castle across the fields. It was along this dark passage that Henry came to visit pretty Anne Boleyn. To-day the castle is a girls' school. Mr. Livermore gave up his flock to work for Mr. Ford.

Electric Eye Lights City

Turns Illumination On Each Night At Proper Time

Experiments in connection with long-distance control of street lighting systems have been conducted by the Stockholm Electric Light and Power Company of Stockholm, Sweden, and satisfactory results obtained. A photo-electric cell, which is affected by light, announces the time for switching the street lighting system on or off. The "electric eye" gives the alarm irrespective of the time of day or night when the switch should be thrown in or out.

The only plausible reason for the grapefruit's name is that the fruits grow in clusters like giant bunches of grapes.

Annual world production of silver is about 250,000 ounces, the bulk of which is used by the chemical industry.

W. N. M. 2046

Nothing More Unightly

Tattered Billboards Are a Blot On Any Road

Alderman Allan Towe, of London, may have been joking when he brought the matter up, but we quite agree with him when he protests that circuses should be made to tear down or cover up their billboards after the show is over. The same thing should be done in the case of political candidates and others who make use of this medium of reaching the public. We can't think of anything more unightly than tattered billboards telling of an event that is "dead and buried."—Border Cities Star.

By Ruth Rogers

500 NEW AND LOVELY FALL MODELS THAT BUTTONS YOUTHFULLY RIGHT DOWN THE BACK

You know that Rayon is using yards and yards of rayon novelties that have the appearance of woolen, for fall dresses. And here's a delightfully smart example, and extremely easy to copy it exactly.

It is a watermelon (an off-red) woolly rayon with printed white flecks. The deep yoke and belt are of plain dull bengaline silk in toning watermelon shade. The buttons are black bone.

It's so unusual, and high priced looking, you'll just love it. Back crepe marocain would also be attractive for it with the belt of self-fabric. Make the yoke of thick dull black satin. Have the buttons covered with the satin. Carried out in black satin, it's also exceedingly smart.

Style No. 500 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 3 1/2 yards 39-inch material with 1/2 yard 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Livestock Production In Canada

Increase In Exports To United Kingdom Is Shown

The fact that every province in Canada is well adapted to the production of livestock gives this industry a wide basis across the Dominion. Canadians are generous meat eaters, consuming in 1933 an average per person of 74 pounds of pork, 56 pounds of beef, 10 pounds of poultry and 6 pounds of mutton and lamb. Each Canadian, on the average, supplements these rations with 30 pounds of butter, about 3.3 pounds of cheese, and more than 21 dozen eggs. To supply the home market is therefore a large order for the Canadian livestock, dairy and poultry industries, and considerable contributions are also made to foreign trade.

During 1933 there was an increase in exports of live cattle to the United Kingdom, the total for the year being 50,317 head compared with 16,568 the previous year. About 10,000 head of cattle were exported to other countries. Exports of beef in 1932 amounted to over 10 million pounds compared with about 4 1/2 million in the previous year, and exports of pork jumped from 46 million to 79 million pounds.

The estimated number of meat and dairy animals in Canada as at June, 1933, was: Milch cows, 3,694,000; other cattle, 5,182,000; sheep 3,385,000; swine, 3,800,700. All classes of poultry numbered over 59,000,000. The gross agricultural wealth of Canada in 1933 was estimated at \$5,230,944,000 of which \$20,135,000 was represented by livestock and \$33,456,000 by poultry on farms.

It is estimated that at least 3,000 lambs weekly are required to supply the retail butcher trade at Montreal. The supply is short of the demand.

More than 1,000 Japanese ships have been equipped with radio telegraph equipment.

Outbreak Of Pale Western Cutworms Of Unusual Severity Forecast After Annual Survey

Should Have Advertised

British Honduras Neglected Publicity Campaign For Chief Product

In this age when so much depends on international trade, even a sharp decline in the use of chewing gum can financially embarrass everybody and throw out of kilter the occupations of a "tiny nation."

For a number of years the people of British Honduras have been subsisting mainly upon the proceeds of the sale of chicla, the raw material out of which chewing gum is made. When the depression started people began cutting down on things that weren't absolutely necessary. Chewing gum came under that category. Consequently the exports of chicla dropped and that colony is reported to be facing a financial crisis due to the loss of trade.

Now the citizens of British Honduras must do something else to keep the wolf from the door. They have decided to develop their banana, citrus fruit, and hardwood exports in order to avoid bankruptcy.

Apparently the British Honduras are not resourceful enough. When they noticed that the exports of chicla were on the down grade, they should have staged publicity stunts to boost their business. For example, contests to see who can stretch gum the farthest and who can chew the biggest wad would no doubt increase the sale of gum and help the chicla trade. Perhaps it is not yet too late to try this suggested stimulant.—Brookville Recorder and Times.

A man may not be too old to learn but too old to realize it.

The SNAPSHOT GUILD THE "WHY" OF LENS STOPS

Two pictures, of the same subject and setting; one made with the lens wide open and the other with the lens drastically "stopped down." Note that there is detail all in the background with the wide open lens, while the other shows the distant bridge very well. If it's detail you want, cut down the lens opening!

PRACTICALLY all cameras, with the exception of a few extremely simple models, have some means of varying the amount of light passing through the lens. Why?

Well, why do you tend to squat in bright sun? Simply because there is so much light in the open sun that, unless you squint, your eyes cannot distinguish details; in the dark your eyes dilate in order to take advantage of every available ray of light.

Cameras and eyes are much alike. Unless you control the amount of light entering the camera lens, you will almost certainly overexpose shots made in bright daylight and underexpose when the light is low. Set out your camera and look at its lens. If yours is a simple box camera, you will find that the lens opening, or diaphragm, has two possible settings, one for average shots and one for use when the light is very brilliant. In certain other cameras diaphragm settings are arbitrarily numbered from 1 to 4, giving you that many opportunities to adapt your snapshotting to light conditions.

The best known system of diaphragm control is the "f" system, used on more advanced cameras. In this system "f" represents the ratio between the lens opening and the distance from the lens to the film. When some one says that he took a picture at f11, he means that his lens was adjusted so that its opening was 1/11th of the lens-to-film distance.

It is the canny joggling of lens openings, and exposure times that marks the experienced snapshotter. But don't let it bother you, if it seems a little confusing. Set your camera at about f.8 and 1/25th— and blaze away. Chances are you'll get the picture, and that is the important thing. If you're using modern film, it will automatically take care of a lot of variation from scientific accuracy in exposure. Happy hunting!

JOHN VAN GUILDER

An outbreak of pale western cutworms reaching proportions of economic severity in Western Canada in 1935 was forecast with completion of annual surveys by officers of the entomological branch of the Dominion department of agriculture.

Prospects are the outbreak will be over a considerably wider area than in 1934 with the general zone embracing the country from Indian Head, Sask., west to within 20 miles of Calgary and south to the international border. Extent of probable loss through the pests depends to a large degree upon the rainfall in the spring during the growing period of the crop.

Farms within 10 miles of Markinch and Saskatoon; within 20 miles of Chamberlain and Haysmore and within a roughly-shaped oval between Kenaston, Sask., on the east and Cavendish, Alta., on the west, and south from Biggar almost to Swift Current will require special attention against the plague. Farms within 10 miles of Cowley, Alta., and within 20 miles of a line from Idelburg through Drumheller to Acme and similarly along a line from Coult to Champion, Alta., will also be heavily infected.

The cutworm attacks wheat and other grains during the early part of the growing season and frequently devours a crop in a heavily infested field. Precautions against loss are based upon a knowledge of the habits of the pest and aim at keeping the land to be cropped free from eggs. This is accomplished by planting land which has not been disturbed during the previous year between August 1 and September 15, by any activity which would break the surface soil crust.

Buist Doctor In World

Said To Be Chief Medical Officer Of London County Council

Much to the gratification of his many friends, Sir Frederick Kay Menzies, LL.D., Chief Medical Officer of the London County Council, is well on the road to recovery from a leg injury which kept him indoors for two months. Notwithstanding his illness he has continued to watch over his vast department, which comprises 46,000 beds, hundreds of doctors, and 10,000 nurses—several L.C.C. hospitals contain more than 1,000 beds. The reorganizing of these institutions when taken over by the L.C.C. from the Guardians in 1933, was a tremendous piece of work, which Sir Frederick performed with great ability and success. The Medical Officer is also responsible for the medical examination of school children. Sir Frederick is, therefore, perhaps, the busiest doctor in the world, but bears his manifold responsibilities with much equanimity and is deservedly popular with his huge staff.

Why Go To College?

Answer Depends On Whether Education Is Really Desired

The question whether in these days it is worth while to go to college cannot be answered in any general way. It depends entirely upon the young man or young woman concerned. If the idea in mind is to have a good time, enjoy social activities, indulge in athletics and at some time emerge with a degree, then by all means stay away. The universities have been tightening up on this type of student for some time past and they are going to tighten up as never before this year. Social parasites will be given no welcome, the university is not for them. There is but one legitimate reason for going to college and that is to secure the training and discipline that a college can give. As for the college it has no time to waste its efforts on the people who are not after training and discipline.

Typist: "Do you know what time I have to get up to be here by nine?" Boss: "No. Why not get here by nine and find out?"

Male fox seals keep watch over their harem from April to July, without food, drink or rest.

WORLD HAPPENINGS BRIEFLY TOLD

Lord Baden Powell is sailing on a world inspection tour of the Boy Scout movement, of which he was the founder. The tour will end in Canada and will last 10 months.

Air service connecting Algeria and French west and equatorial Africa was established when the first mail plane, which left Algiers, Sept. 7, returned after a successful flight. The other terminus is Brazzaville.

Dissolution of the York County Children's Aid Society board, of which former Premier G. S. Henry was chairman was announced by Hon. David Croil, Ontario minister of public welfare.

Boycott of all firms paying unfair wages or forcing their employees to work under sweatshop conditions was urged by J. F. Marsh, Ontario deputy minister of labor, in an address to the Toronto Local Council of Women.

Adoption of a national health insurance scheme will be urged at the proposed Dominion-provincial conference at Ottawa this fall by Hon. G. M. Weir, British Columbia provincial secretary, in a brief presented on behalf of the Canadian Medical Association.

To mark the centenary of South Australia state in 1936, the government has received a gift of \$500,000 towards completion of the new parliament houses. The donor is Sir Langdon Bonython, proprietor of the Adelaide Advertiser, and one of Australia's foremost industrialists and philanthropists.

Little Journeys In Science

CARBON MONOXIDE

(By Gordon H. Guest, M.A.)

Frequently we read of accidents caused by the escape of carbon monoxide gas from the exhaust of motor engines or from furnace pipes. Produced by the burning of carbon, in coal gas, and in motor exhausts, this gas, which is also known as carbonic oxide, is very poisonous, and is doubly dangerous because it has almost no odor, and overcomes victims so quickly that they rarely have time to escape from the fumes.

The deadliness of the gas lies in its action on the blood, where it displaces the oxygen in the haemoglobin, through which it reaches the body tissues. It is identified in the body because of the bright red color which it gives to the blood.

It is estimated that one volume of carbon monoxide in eight hundred volumes of air is fatal when breathed for half an hour, while much smaller quantities are known to produce unpleasant effects if inhaled for any length of time. Small cars travelling at fifteen miles per hour are said to give off forty-one cubic feet of carbon monoxide per hour, while a large car gives off one hundred and eighty-four cubic feet of the gas in one hour. Thus, in large cities the air continually contains small amounts of the gas, and considerable attention has been given in some centres to purifying the air, particularly in tunnels and underground railways. This is done by passing the air over a substance known as hopalite, which changes carbon monoxide into harmless carbon dioxide.

Mice and birds are particularly sensitive to carbon monoxide and sometimes rescue crews in mines take canaries in cages with them into the mines following an explosion in which this gas is believed to have been released.

Buttermilk has the same food value as skim milk.

SUNDAY SCHOOL LESSON

OCTOBER 7

FELLOWSHIP WITH CHRIST

Golden Text: Abide in me, and I in you. As the branch cannot bear fruit of itself, except it abide in the vine; so neither can ye, except ye abide in me, John 15:4.

Lesson: John 15.
Devotional Reading: Matthew 4: 18-25.

Explanations And Comments

Fellowship with Christ and Fruitage, verses 4:11. "Abide in me, and I in you." Abide occurs some sixteen times in John's Gospel. "Abiding in Christ is something more than basking in Christ," (Horace Bushnell). You can hear fruit only by abiding in me: In and through you I will live henceforth, is Jesus' promise. How can one abide in Christ; amid the duties and pleasures of life, can one keep one's mind always fixed upon him? "Ye are in a life until you step out of it, though you may not be thinking of the life. You keep on a road until you take a turning right or left, although engaged in converse with your friend, you do not think of the road. You are in Christ amid the pressure of daily care, and the haste of business, as long as your face is toward the Lord, your attitude that of humble submission, and your conscience void of offense," (F. B. Meyer).

"Apart from me ye can do nothing." One who abides not in Christ is cast forth as a useless branch, and in the vineyards such cast-off branches are gathered and burned. The thought is not to be so pressed as to raise the question of the loss of souls who are once united with Christ. We are concerned here with service rather than salvation. The words, however, are not without serious implications as to the absolute necessity of a real and continuous union with Christ," (Charles R. Erdman).

"Herein is my Father glorified, that ye have much fruit." To "glorify God" means to recognize and acknowledge his true character. The Father is the Husbandman; much fruit testifies to his skill and care. "And so shall ye be my disciples." "Abide in my love; even as the Father hath loved me, I have loved you." And then Jesus reminded them that it was only through obedience to his commandments that they could do so, and further encouraged them in obedience by adding: he had remained in his Father's love by keeping his Father's commandments.

Poor Opinion Of Women

Twelve-Year-Old Jackie Cooper Has Had Bitter Experience

Jack Cooper, young motion picture actor, arrived in New York recently to fill a theatre engagement and said some bitter things about women. Jack is just 12 years old.

"Women are just suckers for your money," he declared, and then declared himself for celibacy.

"I don't think I'll ever have anything to do with them," he said.

Would Segregate All Young Law Offenders

Church Of England Synod Urges Action By Parliament

Canada should segregate her youthful criminal offenders during both trial and prison terms, the synod of the Church of England decided.

On motion of Magistrate J. E. Jones, Toronto, a resolution was passed urging the parliament of Canada to provide separate trials for boys between 16 and 21 years of age and separate penal institutions, similar to the Borsal system in England, where possible.

Most Rev. J. C. Roper, archbishop of Ottawa, seconded the resolution and undertook to bring the matter before the government.

Up to the age of 16, Magistrate Jones explained, the juvenile courts were available, but between that age and 21 there was no special provision. He pointed out the dangers to young offenders of contamination with older and more hardened criminals.

The synod also approved another resolution by Mr. Jones, urging provincial governments to implement Dominion government legislation respecting probation where it had not already been done.

It was certainly the younger offenders to whom attention should be directed, said Rt. Rev. A. Sovereign, bishop of Athabasca. "There are few grey-haired men in our penitentiaries now," he declared. "They are boys, many of them about 18 years old."

"What is a molecule?" asked the teacher.

"A molecule," said John, "is something so small that it can't be seen, even through a microscope."

LAUNCHING OF THE GIANT LINER "QUEEN MARY"

Clydebank, Glasgow, Scotland.—The queen christened the giant new Cunard-White Star liner 534 the "Queen Mary" as the great ship started down the ways to the water.

The Queen Mary, which it is believed will be the new queen of the seas, slid down successfully in a perfect launching.

The choice of the name of a living queen for a christening was most unusual. Right up until the moment of the actual christening, no one had announced what the great ship's name was to be and the suggestion "Britannia" ruled a favorite.

The launching followed a short speech by King George. The Prince of Wales was present besides a multitude of other notables.

After the welcoming speeches to the king and queen His Majesty replied:

"I thank you for the loyal address of welcome to us. As a sailor, I have deep pleasure in coming here to watch the launching by the queen of this great and beautiful ship.

"The sea, with her tempests will not readily be bridled. She is stronger than men, yet in recent times man has done much to make the struggle with her more equal.

"It is still less than 100 years since Samuel Cunard founded a service of small wooden paddle-steamers for carrying mails across the Atlantic to America. Those first Cunard ships were of 1,150 tons. A few people now alive must have been in their childhood have heard those ships spoken of with wonder as evidence of man's mastery over nature.

"Today we come to the happy task of sending on her way the steel ship now in being. I think all these here and elsewhere whose efforts, however inconspicuous or humble, have helped to build her."

His Majesty remarked that for three years the uncompleted hull had lain on the stocks, until a government grant enabled resumption of the work.

"We know full well what misery a silent dockyard may spread among a seaport, and with what courage that misery may be endured," the king said. "During those years when work upon her was suspended, we grieved for what that suspension meant to thousands of our people."

"We rejoice that with the help of my government it has been possible to lift that cloud, and to complete this ship."

"Now, with hope of better trade on both sides of the Atlantic, let us look forward to her playing a great part in the revival of international commerce."

"It has been the nation's will that she should be completed, and to-day we can send her forth, no longer a number on the books, but a ship with a name in the world, alive with beauty, energy and strength."

"Samuel Cunard built his ships to carry mail between two English-speaking countries. This one is built to carry the people of two lands, in great numbers, and to fro, so they may learn to understand each other."

"Both are faced with similar problems, and they prosper and suffer together. May she, in her career, bear many thousands of each race to visit each other as students and return as friends."

"We sent her to her element with the goodwill of all nations, as a mark of our hope in the future. She has been built in fellowship among ourselves. May her life among the great waters spread friendships among the nations."

Trapper Found Dead

Distress Flag on Island Failed To Attract Attention

Vancouver.—A white distress flag hanging from the front door of his lonely cabin at the south end of Cortez island, failed to attract aid for George Reanon, aged 55, when Warden Roy E. Allen, of Powell River, B.C., visited Reanon's cabin September 21, he saw the signal on the door and found the owner lying face down on the floor. He had been dead more than a month from natural causes.

Aftermath Of Yacht Race

Will Not Enter Another Challenge, Says Sopwith

Newport, R.I.—Endeavour, the trim sloop which completed an unsuccessful but impressive bid against Rainbow for the America's cup, is not for sale.

Her owner, T. O. M. Sopwith, said emphatically, "I am not selling Endeavour," when he was advised of reports that a movement was afoot in Nova Scotia for a group of Canadian yachting enthusiasts to purchase the blue-bolt yacht and challenge the United States for the America's cup. Sopwith said there was no reason why he should sell the craft.

"She is going back to England inside of a fortnight," he added. "I'm going to race her next summer in England."

While Sopwith has flatly said he will never challenge again, there were many here who held to the opinion a challenge would be forthcoming nevertheless.

The 1934 races, most turbulent in the history of the cup, continued to be the chief topic of conversation in yachting circles and there was an amazing agreement of opinion. The most salient points on which there was more or less accord was that Endeavour was a faster boat than the Rainbow and that superior seamanship was the factor that enabled the United States boat to overtake and vanquish the Endeavour.

Those who argued Britain would again challenge for the cup held that Britons must have been encouraged by the fine showing of the Sopwith yacht.

Members of the Rainbow camp did not hesitate to admit they were extremely lucky in edging out the big blue invader.

Signs Amnesty Decree

King Victor Emmanuel Releases Many Short Term Prisoners

Rome.—King Victor Emmanuel celebrated the birth of his granddaughter, Maria Pia, by signing a decree of amnesty liberating all prisoners sentenced to two years or less in jail.

Although the amnesty does not apply to political offences and certain heinous crimes, it includes many military offences and will result in the release of many thousands of prisoners.

Not only that, the amnesty cuts two years off sentences of more than two years' duration.

League Protest

Warsaw.—The national minority committee of White Russians lodged a protest with the League of Nations assembly against the Soviet entry into the league, the government newspaper Kuryet Prosvany reported.

28th Battalion Reunion

Association Celebrates 20th Anniversary Of Mobilization This Year

"First call" has sounded for members of the 28th North West Battalion Association for the annual reunion.

This year the battalion celebrates the 20th anniversary of the mobilization for overseas.

Arrangements are now being made for the annual reunion to be held at the Kitchener hotel, Regina, on Saturday, November 3.

Announcement was made of appointment of a committee to take charge of arrangements under the chairmanship of Colonel J. A. Cross.

The committee is composed of: Colonel A. G. Styles, Major G. Fraser Stewart, Colonel James McArthur, Major Walter McInnis, Captain P. G. Harcourt, H. C. Bull, L. G. Geernaert, H. Bicknell, S. Kramer, publicity, Colonel James McArthur, P. G. Creney, church parade, Brigadier-General Embury, Captain P. Harcourt.

Members of the battalion are requested to communicate without delay intention to be present. Such intention should be forwarded to P. G. Creney, secretary of the reunion committee, 4004 Dewdney avenue, Regina, or J. V. Douglas, secretary of the Battalion Association, 2229 Eighth avenue.

RE. REV. W. C. WHITE

Win Balloon Race

Believe Poland Has Swept Honors In Competition

Warsaw.—Poland, playing host to the 22nd annual Gordon Bennett balloon race, apparently had swept honors in that competition.

Official results will be delayed several days, it was announced, pending the arrival of the balloonists' landing books.

It was believed the Polish "Burszawa" (Warsaw), crewed by Z. Burzynski and J. Zakrzewski, which landed near Riazan, Russia, was the winner, having covered approximately 750 miles.

The "Kosciuszko," piloted by Captain Franciszek Hynek, which landed near Voronezh, Russia, was believed to have taken second place.

The third Polish balloon, the "Polonia," burst and fell into a lake some 200 miles north of Helsinki, Finland. Its chances for third place were believed good.

All 16 that took flight have been reported safe.

Making World Tour

Montreal.—The freighter City of Ennsville, which sails from Montreal October 6, will be the first vessel out of this port to make a complete round-the-world circuit. The ship will go through the Panama Canal to the far east and will return by way of the Suez Canal and across the Atlantic.

May Reduce Exams

Toronto.—Ontario department of education plans to reduce the number of student annual examinations, it was announced by Duncan McArthur, deputy minister of education. The object is to lower costs and save students a certain amount of work.

Kidnapping Menace

Hon. Arthur Roebuck Addresses Conference In New York

New York.—Hon. Arthur Roebuck, attorney-general for Ontario, laid before law enforcement and crime prevention authorities of the United States, a plan designed to eradicate the growing menace of kidnapping for ransom.

The law's reply to challenges from kidnappers, he declared, should be "certainty of apprehension, and make the business unprofitable." This would be accomplished by making it illegal to pay a ransom and by withholding all police authorities into a mobile unit which could be stretched out in any direction at sudden notice.

Mr. Roebuck, speaking at the New York Herald-Tribune's conference on current problems of 1934, emphasized his opposition to what he called centralization of police authority "and the reorganization of our civil officials on the basis of a standing army." But what he thought was required was "generalship; and generalship necessitates unified control."

There was no need for centralized management of all our forces, he said, but only centralized command and all resources in the hands of a unified criminal investigation department."

He told of his plans to submit at the next session of the Ontario legislature measures designed to widen authority of this branch of the Ontario Provincial Police.

He also told of his preparations to submit to the legislature a proposal which would "entrust the executive with power to supervise the bank accounts and other resources of relatives, friends and other persons while they are subject to the pressure of such illegal demands, and by so doing thus forcibly prevent payment of ransom."

Mr. Roebuck agreed such measures might prove hardship to relatives of a kidnapped victim but he expressed the conviction that if plotters knew in advance a ransom could not be paid and such payment would be prevented by law authorities, "the relative would not address to the new world. It is not new that the state should ask individuals to bear hardship for the common good."

Returns To England

Premier Ramsay MacDonald Much Improved After Long Holiday

St. John's, Nfld.—In this Newfoundland capital, Premier Ramsay MacDonald of Great Britain delivered his first address to the new world on the eve of his departure for the Old Country to take over once more the reins of government. His sight improved and his general health restored by a long holiday in Canada and Newfoundland, the British prime minister sailed Sept. 28 aboard the liner Nova Scotia for Great Britain with his daughter, Isabel, who accompanied him on the tour.

THE ROYAL COUPLE TO WED IN NOVEMBER

This picture shows the arrival of Prince George and Princess Marina from Munich on their way to visit King George and Queen Mary at Balmoral Castle. The newly engaged royal couple will be married at Westminster Abbey on November 29, and it is understood that the Prince of Wales will be best man.

REQUEST OF RUSSIA CAUSES STIR IN LEAGUE

Geneva.—Russia's surprise move to get the council of the League of Nations to strike a balance on disarmament apparently had stirred up a hornets' nest.

Because the "dynamite" contained in Foreign Commissar Maxim Litvinov's request that the council obtain a report on whether the disarmament conference can be successfully resumed, efforts were made to induce him to withdraw it.

Statesmen in some quarters were known to be apprehensive lest a report from Arthur Henderson, president of the disarmament conference, might blame failure of the conference on Germany's withdrawal.

This, it was explained, inevitably would raise the question of the alleged re-arming of Germany in violation of the treaty of Versailles—a question some countries are desirous of avoiding.

Litvinov's proposal would throw the whole question of disarmament back into the lap of the league council, which then would be responsible for choosing the path leading to disarmament. The proposal was contained in a letter to Richard Sander, resident of the league assembly.

Wants To Keep Control

British Columbia Reluctant To Surrender New Wage Law

Victoria.—With what he considers higher wage standards and labor conditions in effect in British Columbia than in other parts of Canada, the province would be reluctant to surrender control over its minimum wage and labor regulations to the Dominion authority, Hon. G. S. Pearson, minister of labor, stated.

According to the estimate of Premier T. D. Pattullo, payrolls in British Columbia have been increased \$500,000 monthly by minimum wage scales put into effect in the province during the present year.

Mr. Pearson was speaking of the report that the Dominion might propose taking over control of wage scales, at the coming Dominion-provincial conference. The minister is in agreement with the idea of having wage legislation adopted throughout Canada but is opposed to the Dominion setting rates for this province. British Columbia is willing to discuss the matter of wages for the whole of Canada lower than those it feels are right, stated the minister.

Handle Poultry And Eggs

Marketing Plan To Regulate Sale May Be Considered

Ottawa.—Submitted by Western livestock and poultry interests, the Dominion marketing board had under consideration a marketing scheme to regulate the sale of poultry and eggs from Manitoba, Saskatchewan and Alberta. A possibility exists the scheme for poultry may be adopted in time to handle the fall marketing.

Another scheme emanating from the west also is before the board.

Both schemes were presented by R. P. Roblin, president of the Saskatchewan Livestock Producers' Co-operative Association; G. H. Barr, Regina lawyer, and W. A. Landreth, Winnipeg, of the Canadian Poultry Pool.

Will Represent Canada

Ottawa.—Hon. Arthur Meighen, government leader in the senate and member of the cabinet without portfolio, will attend the centennial celebrations at Melbourne, Australia, next month, as representative of the Empire Parliamentary Association and of the Dominion government. He will sail from Vancouver on October 20.

Held Conference Over Radio

London.—Over a world-wide wireless telephone network the Sydney, Johannesburg, Bombay, New York and London branches of a well known British engineering firm were linked up last week for purposes of a conference. The voices came over distinctly and the conference was voted a success.

VICTORY BOND CONVERSION HELPS BUSINESS RECOVERY

Prime Minister's Statement Receives Nation's Approval.

Ottawa, Oct. 3.—The Prime Minister's frank concise statement regarding the 1943 Refunding Loan has met with warm and encouraging response from bankers, insurance and trust company executives, business men, professional men, agriculturists and labor leaders. The concrete evidence of business recovery which Mr. Bennett stressed in his opening announcement such as a 50 p.c. increase in industrial production, 37 p.c. increase in employment, 43 p.c. increase in farm products prices, as well as a substantial improvement in car loadings, electric power production and wholesale prices, emphasizing strengthening of the national credit and the steady general upturn in business.

Completion of this year's refunding program will bring the total war loan refinancing (inaugurated in 1931) to more than a billion dollars. \$9,000,000 per annum has already been saved in interest charges, and when this year's operations are concluded the annual saving in interest will be \$14,000,000, and eventually should enable the Government to reduce taxes.

The tenor of the comments from bankers, insurance and trust company executives and others is fairly summed up by the unanimity of the opinions—that Canada has emerged from the depression with less strain than experienced in other countries.

The consensus of opinion is that by reason of the favorable basis of conversion and the attractive yield offered, the majority of 1919 Victory Bond holders will convert, and new investors hasten to secure an allotment of the new Bonds.

McFarland Wants to Know.

John I. McFarland, general manager of Central Selling agency of Canadian Wheat Pools, has suggested that an investigation be held on wheat futures operations on the grain exchange at Winnipeg. He would ascertain the source of heavy selling of futures in Winnipeg market in recent weeks in the face of reduced marketing and delivery by farmers.

One report in circulation at Winnipeg Monday, was to the effect that, to frustrate an alleged calculated effort of international grain gamblers to batter down prices of Canadian wheat, the Federal government may take over the entire marketing machinery. This action would mean the virtual closing down of Winnipeg grain exchange as a wheat trading organization.

LOST—Set of truck chains between Sinner's Corner and Stony Plain. Reward. V. Assinger.

For Sale, 1928 Chevrolet Coupe, in good shape; about 100 feet of Cement Pipes, 30" inside measurement. Edw. Bricks, Stony Plain.

For Sale, 2d Hand Wagon at Sun Tank. B. Breitkreutz, ny Plain.

For Sale—Five-year old Holstein Bull; dehorned, good papers; price reasonable. H. Giesbolhaus.

For Sale—Buggy Gear. B. Breitkreutz, Stony Plain.

THE NEWS OF STONY PLAIN AND DISTRICT.

Mr and Mrs Bitner will be leaving Stony in a short time for Barrehead, where Mr Bitner has secured the selling agency for a popular product.

Mr and Mrs Jac McGillis have returned to the City, after a short visit with friends here.

Messrs Hoffman and McCulla returned Monday from a very successful bird-game hunt in the Peace River district.

Threshing has been resumed in some districts, following the long hold-up due to unfavorable weather.

Car plate 85076 lost on road to Golden Spike. Return to H. Enders, Spruce Grove.

THEN AND NOW.

Fifteen years ago Canada was engaged in floating one of the most successful of its war loans. National enthusiasm was at its highest pitch. Business was booming and money was plentiful. Results exceeded the fondest hopes, nearly 800,000 citizens subscribing for the 1919 Victory Loan Bond. True, the income yield of 5 1-2 p.c. was very attractive, but opinion then was, that people subscribed more from a wholehearted desire to assist national reconstruction rather than because of the attractive rate of interest.

Holders of these 1919 Victory Bonds, which will mature Nov. 1, are now being asked to convert these into bonds of the 1934 Refunding Loan. That the majority of holders of 1919 Victory Bonds will avail themselves of this privilege there can be no doubt. They know what a safe and profitable investment they have had and will surely wish to continue it.

The record of Dominion of Canada Bonds during the past few years, when investors have suffered loss of capital and distress of mind, demonstrates conclusively that there is no safer investment than Dominion of Canada Bonds.

Security of principal is paramount in any investment. Consequently, when the unassailable security of Dominion of Canada bonds is coupled with so desirable an income yield as is offered by the new bonds, the response from those having bonds to convert as well as applications from new investors should be both prompt and enthusiastic.

3. HOW TO LAY OUT THE FIELD

NO insurmountable problem faces you when you come to consider laying out your Skeet field. Any piece of waste land will answer the purpose. It should face northeast, and a good, clear background is essential in order that you may see the flying birds distinctly. Dimensions should be 300 by 600 yards, and the actual shooting stance should be on firm ground, although the balance of the area, the danger zone, may be swamp, water, or dry land.

Probably one of your members owns such a piece of ground which has not been able to use, and which he would be willing to lend to the club. If not, a good field may be obtained for a low rental, which will be covered by the earnings of the club during the year. The general plan of a Skeet field is shown in the accompanying diagram, and is reproduced in the marketplace at the top of each of these articles. Imagine a huge wheel cut in half, with seven spokes radiating exactly thirty degrees apart. Standing on the hub—which is Station 8—and facing the rim, the first spoke to the right, where the spoke would intersect, is Station 1. Move thirty degrees to the left along the rim, and you have Station 2. And so on to

Station 7, which is the extreme point on the left end of the rim, opposite Station 1, and in direct line with Station 8. Stations 1 and 7 are 40 yards apart. Station 8 is, of course, exactly half way between them. A twenty-yard cord, fastened at one end to Station 8, will mark off the complete semi-circle from 1 to 7. It is an easy matter to mark off the rest of the Stations along the rim of the semi-circle, remembering that Station 4 is immediately facing Station 8. It will be found that the Stations along the rim are approximately 31 feet apart from each other.

At Stations 1 and 7 are located the traps. The high trap, 10 feet from the ground, is located at Station 1, and the low trap, 3 feet from the ground, is placed at Station 7. More about these in our next article. Watch for it.

One last word. Posts should be firmly planted at each Station, plainly marked with the number. This completes the layout of the field. Planted or cindered walks and stands may be constructed, if and when you desire them. Of course, the amount of finishing in this respect will depend entirely on the tastes and resources of the members.

This is No. 3 of a series of 12 articles on Skeet Shooting. Cut it out. When all have been clipped, you will have a complete write-up of this sportsman's sport which is rapidly becoming the vogue across Canada.

New Cuts on Hogs.

New hog cuts went into effect on
Calgary and Edmonton yards Monday
of this week, Sept. 24. The list
now shows the off grades discounted
as follows:

Heavies, 75c; extra heavies, \$1.25
roughs, \$3.25; No. 1 smooth sows,
\$2; all other sows \$2.75, and erip
ples \$2 under grade.

Maedchen in Uniform.

A good-sized crowd on Friday
night enjoyed Mr. Steurmer's pic-
ture "Maedchen in Uniform," in
which Dorothea Wiek, the popu-
lar German star, had the leading
role. The story was about a board-
ing school in the Old Land, attend-
ed by a number of young girls. The
picture depicted the life the girls
led in the school, the rules they
were governed by, and the food
they receive. "Mickey Mouse" the
comic shown, proved to be a real
treat for the younger element in
the audience.

Genesee Mike Goes to Cooler

For being too strenuous in his
attentions toward the young ladies
in town, Mike Coszinski of Genesee
appeared before a local magistrate
on Saturday evening and was
given thirty days with hard labor
at the Fort in which to allow his
ardor to cool off.—Ledue Repre-
sentative.

"Shooting the Bull."

"Shooting the Bull not a
journalistic pastime at Atha-
basca," remarks The Echo,
and continues "P. G. Thomson,
the Edmonton barrister, has
renewed cause for twitting
Athabasca. But he knows
when we shoot the bull at
Athabasca it is the real thing.
Axel Anderson was given 12
months by Magistrate Clark
for this offence. After 3 days
at the Fort he was set at lib-
erty on order of Judge under
appeal by P. G. Thomson.

Another more tragic case of
bull shooting occurred last
week when Pete Hall was so
enraged at his own bull in his
crop that he got a gun and
fired at it. In loading the gun
for another shot he dropped
dead of heart failure.

A NEW CENTRAL UFA DEPOT PROPOSED.

The establishment of a cen-
tral depot to serve UFA Co-
ops. is now a possibility as a
result of a meeting of UFA
district Co ops. last week in
Edmonton. Plans for the en-
largement of Co op activities
were discussed, and reports
received of work of the past
season. The reports showed a
very substantial gain in vol-
ume of business.

Among the directors at-
tending was Gen. Bevington,
representing East and West
Edmonton districts. Mr. W. T.
Propp, Co-op. manager for
Stony Plain district, was also
in attendance.

Opening of School of Agri- culture, Vermilion.

The announcement of Hon F. S.
Grisdale that Vermilion School
of Agriculture would re-open has been
warmly received by a number of farm
folks who have boys to send to the
institution for training, and as well
scores of young ladies who desire the
very practical course in Home Econ-
omies which it offers.

Already the response, as measured
by registrations for the winter's
course, has been very gratifying, as
well over 150 applications have already
been received. The well equipped
dormitory will hold close to 200 stu-
dents so that there is still room for
those who wish to spend a profitable
winter at a minimum of expense.

Board and room has been reduced
to 80 cents per day and the institution
furnishes the bed linen and pro-
vides the laundry of same. There are
no costs or tuition fees, and Alberta
thus offers a course in Agriculture for
boys and one in Household Science for
girls at a cost that is most reasonable.

While Stony Plain occupies a very
prominent position as a grain pro-
ducer district yet so far very few of
the farmers sons or daughters have
availed themselves of the course in
Agriculture and Household Science as
offered at Vermilion.

berger, Stony Plain P.O.

On the Side.

Believe it or not—a dispatch
states that a plague of blood-suck-
ing flies in Maryland has com-
pelled farmers to provide clothing for
their cows. These include four-
legged trousers which cover the
legs and the lower parts of the
bodies.

There has been a lot of discus-
sion lately as to which is the long-
est word in the English language.
A local parent says that, after not-
icing the antics of his daughter
and her regular fellow, that he is
of the opinion that the longest
word in any language is "Good-
night."

Here's a story from a friend
at Seba: An elderly gent from the
prairies went there to fish. Never
having had any experience along
this line, he engaged a small boy
to guide him and the boy furnish-
ed the necessary tackle and bait.
Finding a suitable spot, the boy
set the old gent up with a line and
pole, while he went farther along.
When the boy returned some time
later, the novice inquired the price
of the red bobber on his line, and
the boy replied this price was 10
cents. "Well," said the stranger,
reaching in his pocket, "I guess I
owe you a dime; the pesky thing
sank a few minutes ago!"

Canadian Wheat Institute.

Proposals for forming the Cana-
dian Wheat Institute as a national
body to conduct work in the inter-
ests of Canadian wheat were en-
dorsed by the annual convention of
Canadian Chamber of Commerce,
which met in Winnipeg, Sept. 11,
12, 13. This followed an address
by Mr. R. S. Law, Pres. of United
Grain Growers Ltd., in the course
of which he dealt with the need
for putting a new force behind the
sale of Canadian wheat and showed
how thru the proposed Institute
advertising, commercial research,
scientific research and other ef-
forts might be brought to bear to-
wards the enlargement of outlets
for Canadian wheat.

Mr. Law spoke on the subject
"Wheat from the National Stand-
point" and much of his address
emphasized the national impor-
tance of our wheat industry. Mr.
Law said "It should be realized
that growing wheat for export has
been part of the basic policy of
Canada for 35 years. On it was
founded our immigration policy;
on it was predicated a large part of
our railway construction. That
western Canada should be opened
up, that people from other coun-
tries should be invited to come in,
that financial institutions should
pour their resources into the prai-
ries, and that factories should be
built to supply farmers' needs—all
that was part of the national de-
termination of the country since
the beginning of the century. The
welfare of Western farmers, the
welfare of western Canada, and to
a large extent the welfare of the
Dominion of Canada must continue
to depend on our ability to main-
tain large outlets for the West's
wheat." The resolution which was
subsequently passed by the Con-
vention reads—

"Realising the importance of Cana-
dian wheat production to the
prosperity of Canada, the Cham-
ber has been gratified to learn
that those directly interested in
the production and marketing of
Canadian wheat have under con-
sideration the organization of a
Canadian Wheat Institute as a
national body to stimulate the
marketing and use of wheat in
the markets of the world. The
chamber extends its closest co-
operation in this endeavor."
